

# Stopping Covid-19 They Won't, Starting a War They Will---

**T**he government refuses to pay for a national strategy to suppress and eradicate Covid-19, while attacking **the science of Public Health**. The government is also actively spreading the pandemic by forcing workers, teachers and students back into unsafe jobs and schools. Meanwhile the politicians continue to increase the \$Trillion military/**war budget** as tensions and flashpoints rapidly increase around the world. US confrontations with China, Russia and others from the Mediterranean to the South China Sea and from Alaska to Europe are accelerating. The *New York Times* calls it a New Game of Thrones. <https://www.nytimes.com/2020/08/30/opinion/turkey-greece-oil-gas.html>

The ongoing pandemic is continuing the massive job losses of more than 30 million. Close to a quarter of a million will have died from Covid-10 by December 31, 2020. . Illness, lack of health insurance, low wages, inadequate schools, and hunger, combined with accelerating racist police murder is causing massive frustration and anger.

We cannot allow our political focus to be deflected and redirected into a “patriotic war” for the billionaires who have looted the US Treasury to save the profits of Wall Street and put millions out of work. *Our main problem* is not China, or Russia, but the *1% who control and profit from corporate capitalism*. It is they who are actively spreading this pandemic, destroying our health, jobs, families and futures. Rank and File workers in many industries *are organizing for a general strike*. The united working class has the power to stop the pandemic and the coming wars. Let us demand the needs of the 99% be met now. Make the billionaires, the corporations,

banks and Wall Street pay. It is time to fight for the health of the people.

Don't play the Billionaire's Game of Thrones.  
**Abolish all thrones!!**
